Overall orientation

7.1 The overall objective of the programme is to promote and support international cooperation in the pursuit of sustainable development for all. While focused on tackling interlinked challenges in the economic, social and environmental fields, the programme also seeks to contribute to a mutually reinforcing relationship among the three pillars of the United Nations: peace and security, development and human rights.

7.2 The programme, which is under the responsibility of the Department of Economic and Social Affairs, ensures complementarity and synergy among its nine subprogrammes. Its key programmatic thrusts are: (a) to provide substantive support to the bodies established under the Charter of the United Nations dealing with development issues, namely, the General Assembly, the Economic and Social Council and its related functional commissions, and expert bodies; (b) to monitor and analyse development trends, prospects and policy issues globally; and (c) to provide support for capacity development in policy formulation and implementation, in particular in relation to the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals, through, inter alia, the implementation of the regular programme of technical cooperation and United Nations Development Account projects.

7.3 In the biennium 2018-2019, the programme will continue to mobilize and provide practical support to help to translate the development commitments into action. To further enhance its key programmatic thrusts, it will focus on the delivery of the following functions: (a) monitoring, research and analysis of development issues and emerging challenges, including through support for the global statistical system; (b) normative and policy support for United Nations intergovernmental processes; (c) assistance in capacity development to support the implementation of global conference outcomes at the country level; and (d) fostering collaboration and partnerships within the United Nations system and with civil society and the private sector, while ensuring proper accountability and oversight by Member States. Increased attention will be given to the capacity development needs of the least developed countries, small island developing States and countries emerging from conflict.

7.4 The programme has placed development issues at the centre of global deliberations and helped Member States to forge a shared vision of development, as identified in the outcomes of major United Nations conferences and summits. The programme will continue to support the implementation of the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals, and its follow-up process, as well as the follow-up to and implementation of the outcomes of the Addis Ababa Action Agenda on financing for development.

7.5 Fulfilling those functions requires strengthened analytical and monitoring capacity to identify and address emerging issues and cross-cutting policy challenges and to support both national development strategies and accountability and monitoring mechanisms at the intergovernmental level. Strategic integration is also essential to promoting a coherent and coordinated implementation process in advancing the 2030 Agenda for Sustainable Development, including the Sustainable Development Goals. This includes enhancing horizontal linkages across the subprogrammes to facilitate more effective and flexible support for Member States

in pursuing the 2030 Agenda, including the Sustainable Development Goals, in cooperation with entities of the Executive Committee on Economic and Social Affairs, to which the programme provides strategic support and ensures its stronger linkages with the United Nations Development Group, other executive committees and various other partners.

7.6 The programme will continue to emphasize the mainstreaming of gender perspectives into its subprogrammes.
